DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 in part, 2, 3 in part, 4, 5 in part, 10 in part, 11, 12 in part and 13 are, drawn to compounds and compositions, classified in class 514, 546, 548, in various subclasses.
- II. Claims 6-7, 10 in part, 12 in part and 13 are, drawn to compounds, classified in class 514, 544, subclass 106+.
- III. Claims 1 in part, 8-9, 10 in part, 12 in part and 13 are, drawn to compounds and compositions, classified in class 514, 546, 548 in various subclasses.
- IV. Claims 14-23 are, drawn to methods of using the various compounds of claims 1-13, classified in class 514, in various subclasses.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process as claimed can be practiced with another materially different product such as shown in U.S. Patent number 6,531,492.

Art Unit: 1626

Groups I-III are drawn to three distinct compounds as demonstrated by the different formulae. Additionally, the inventions of Groups I-IV are independent and distinct because there is no patentable co-action among the various groups and a reference anticipating one member will not necessarily render another obvious.

In addition, because of the different classes and subclasses and divergent subject matter, in each of the Groups, a serious burden is imposed on the examiner to perform a complete search of the defined areas. Therefore, for the reasons given above, the restriction set forth is proper because it would constitute an undue burden on the examiner to examine all of the inventions in this application.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Arlene K. Musser on 01/11/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to E. Sackey whose telephone number is (571) 272-0704.

The examiner can normally be reached on Monday-Friday from 7:30 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph K. McKane, can be reached on (571) 272-0699. The fax phone number for this Group is (571) 273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is

(571) 272-1600.
